

# RESEARCH & DEVELOPMENT

Marion Technologies develops your tailored solution, whatever your applications fields.

## 01

We define together your needs and objectives and establish your requirements specifications.

## 02

We produce your tailored materials on a lab scale. We make use of «soft-chemistry» approach combined with post-synthesis treatments. Your prototype is validated in your intended system.

## 03

We proceed to a scale-up of your material production pathway.

## 04

Our production team takes over of your material fabrication on an industrial scale in our plant, between kg to tonnes per year.

Our knowledge and skills are validated by ISO 9001 version 2015 and EN 9100 certifications.
